

Klein Hersh

INTERNATIONAL

For the last ten years, Klein Hersh International has specialized exclusively in the life sciences. We place approximately 300 scientists throughout the country every year. We are currently working extensively in the Immunology/Inflammation areas, with opportunities throughout the country.

More specifically, we are currently working with a premier biotech organization in the mid-Atlantic region that is pursuing extensive efforts in the asthma, COPD, and autoimmune fields. We are seeking a PhD-level individual to establish and run Asthma and COPD. This individual will be responsible for leading a small team of direct reports, as well as significant matrix management responsibilities, working closely with translational research and clinical development. The ideal candidate will have strong communication skills, extensive *in vivo* pharmacology experience, and focused efforts in Asthma and COPD.

Job Requirements:

- PhD in biology or pharmacology
- Strong background in Immunology
- 2+ years experience working in COPD (industry experience is strongly preferred)
- Strong understanding of the mechanisms underlying COPD pathology
- Technical expertise in the handling and manipulation of mice in various models of COPD and lung injury

For confidential consideration or to recommend anyone that would be qualified for the role, please contact Allison Swartz, Head of Biology Efforts at 215.830.9211x119 or aswartz@kleinhersh.com
